Albert Smith, sworn: Knew the accused, and saw the child. The husband came home and inquired for the infaut, and the woman said that she had put it in the sewer. He made inquiries, not believing the statement his wife had made. Witness told him to get an officer, which he did, and the woman repeated the story to the policeman, and went with him to the corner of Fifteenth and I streets and pointed to a sewer where the accused had thrown it. The baby was taken out, and had been there about two hours.

Cross-evamined: The woman said nothing to anybody after the child was taken out of the trap. Said she was out of her senses and that the priest told her to do it. The same night she put the child in the trap she was moving her things across the street and back. Had heard her at different times laughing to berself, asking questions and answering them.

Francis Brooks, sworn: Lived in Sampson street. Went to the trap with the officer and Mrs. Newman, and found the child in the sewer. Witness got down in the trap and brought it up. It was dead when taken out.

General Debility.

Debility is a term used to denote deficiency of blood. The nutritive constituents of the blood are in less than their regular proportion, while the watery part is in excess. Debility is of frequent occurrence. It is incident to a variety of diseases. The lower limbs are apit to be swoisen. The patient is feeble, and cannot bear much exertion. The circulation is irregular, but almost always weak. Palpitation of the heart is a very common symptom. Violent motion often throws the heart into the most tumultuous action. The vital functions are languidly performed. The nuceular strength is diminished; fatigue follows moderate or slight exercise. The breathing, though quiet when at rest, becomes burried and even painfully agilited under exertion, as in running, ascending helpits, etc. The nervous system is often greatly disordered. Vertigo, distriness and a feeling of faintness are very common. Violent and obstituate neuralic boddy, are also frequent attendants upon the disease. The secretions are sometimes diminished, in females the mensos are almost always either uspended or very partially performed. The bile is scanty, and cosiliveness, with unhealthy evacuations from the bowels and dyspeptic state of the siomach, are extremely common symptoms.

MARVELOUS EFFECT.

MARVELOUS EFFECT.

H. R. Stevens:

DEAR SIR: I have used VEGETINE, and feel it a duty to acknowledge the great benefit it has done me. In the spring of the year 1882 I was sick from general debility, caused by overwork, want of sleep and proper rest. I was very weak and much emaciated. I tried many remedies, without receiving any benefit from any of them, until I was persuaded to try VEGETINE. Before I had taken this one week my improved condition gave me renewed hope and courage. I continued to take it every day, gaining more strength, until I was completely restored to health. The effect of this Remedy, in the case of general debility, is indeed marvelous.

Mr. Stevens:

Dran Sir: I write you this note to inform you of the effect of your "Blood Farifier" agon my system. When I commenced taking it, a year ago, I was very much debilitated. My limbs were swollen so that it was impossible for me to get into or out from a carriage, and very painful to go up or down stairs. Indeed, I could scarcely stand on my feet. My appetite was gone, my strength failing rapidly. After using your medicine for a few weeks I began to improve. My appetite improved and my strength returned. I can now perform my duties as a name Yours gratefully. Mrs. C. A. H. TILDEN.
